## **Monitoring Plan XML Schema Version 1.1**

### **1.0 Introduction**

This document is the first in a series that outlines the Extensible Mark-up Language (XML) schema and how data files must be formatted for the Emissions Collection and Monitoring Plan System (ECMPS). A schema has been developed for each data type, i.e., monitoring plan, quality assurance and certification test data, emissions data. The schema will be used for all monitoring plan data that are imported into the ECMPS Client Tool and exported from the Client Tool. The move to XML will allow users to submit only the necessary data for a given submission of data. It will also allow for more robust data validation through the XML schema.

The schema is included in a separate file. The schema may be viewed in any application that is able to display text files or an application specifically designed for viewing XML schema.

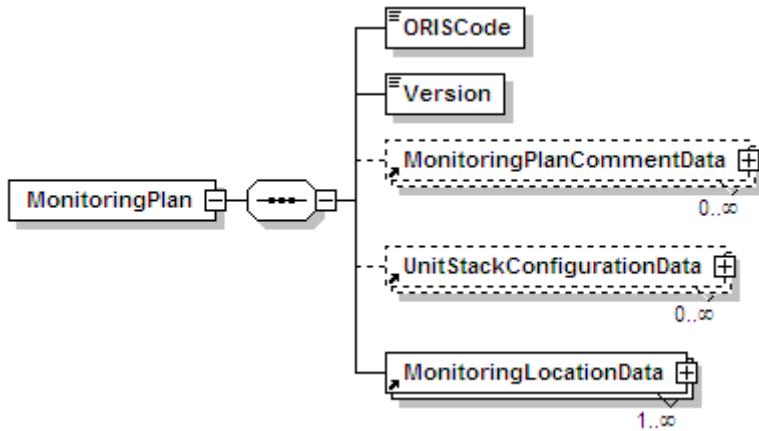

### **2.0 Monitoring Plan XML Schema Tables**

The following tables provide information about the data elements of the Monitoring Plan XML schema. The information includes a description of the data element, the type of the element, and, where appropriate, a reference to the relevant EDR record type and column. If an exact correspondence between a single EDR record type and column and a data element could not be made, the column in the table will include the "N/A" designation. In other cases because the data have been restructured, it was not possible to make an exact match between a record type and column and a data element. In these cases, the record type and column are marked as "N/A."

Figures 1 and 2 provide information on the root element of the Monitoring Plan XML schema. Figure 3 lists all of the complex data elements and information that indicates the parent-child relationship between the major data elements. Figures 4 through 49 include information on the complex data elements in the XML schema.

Detailed information about the data types is included in Figure 50. The term "optional" is often used in the names of the various data types. The term "optional" in the name of these data validation data types only refers to the fact that the schema validation will accept a data element tag that does not include a value (an empty tag). Depending on the data being reported, these data elements might require data to be reported.

**Figure 1**  
**MonitoringPlan**

**Figure 2**  
**MonitoringPlan XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
ORISCode	ORISCodeType	EIA -- assigned identifier or Facility identifier assigned by CAMD (if EIA number is not applicable).	N/A
Version	VersionType	Identifies the XML schema version.	N/A

**Figure 3**  
**Complex Elements of the MonitoringPlan Root**

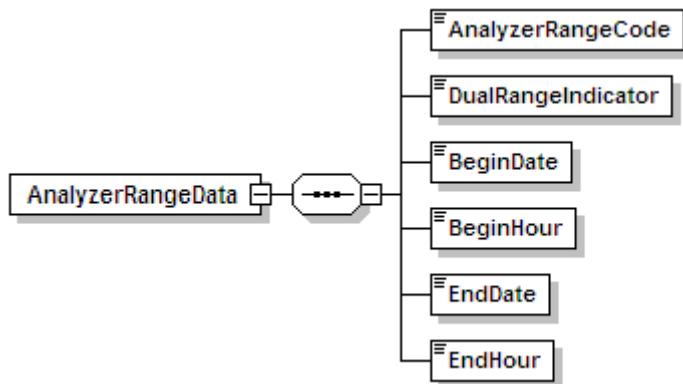

Complex Element	Parent Element	Minimum Occurrences	Maximum Occurrences
AnalyzerRangeData	ComponentData	0	unbounded
ComponentData	StackPipeData or UnitData	0	unbounded
MonitoringDefaultData	StackPipeData or UnitData	0	unbounded
MonitoringFormulaData	StackPipeData or UnitData	0	unbounded
MonitoringLoadData	StackPipeData or UnitData	0	unbounded
MonitoringLocationAttribData	StackPipeData or UnitData	0	unbounded

UnitStackConfigurationData	MonitoringPlan	0	unbounded

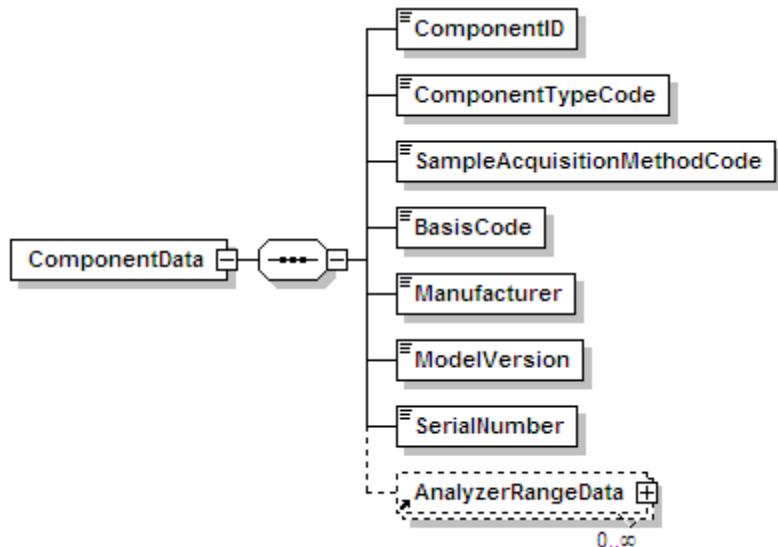

**Figure 4**  
**AnalyzerRangeData**

**Figure 5**  
**AnalyzerRangeData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
AnalyzerRangeCode	AnalyzerRangeCode Type	Code used to identify the analyzer range.	New
DualRangeIndicator	IndicatorType	Used to indicate whether the component is a dual-range analyzer.	New
BeginDate	OptionalDateType	Date in which information became effective or activity started.	510:100
BeginHour	OptionalHourType	Hour in which information became effective or activity started.	New
EndDate	OptionalDateType	Last date in which information was effective or date in which activity ended.	510:108
EndHour	OptionalHourType	Last hour in which information was effective or hour in which activity ended.	New

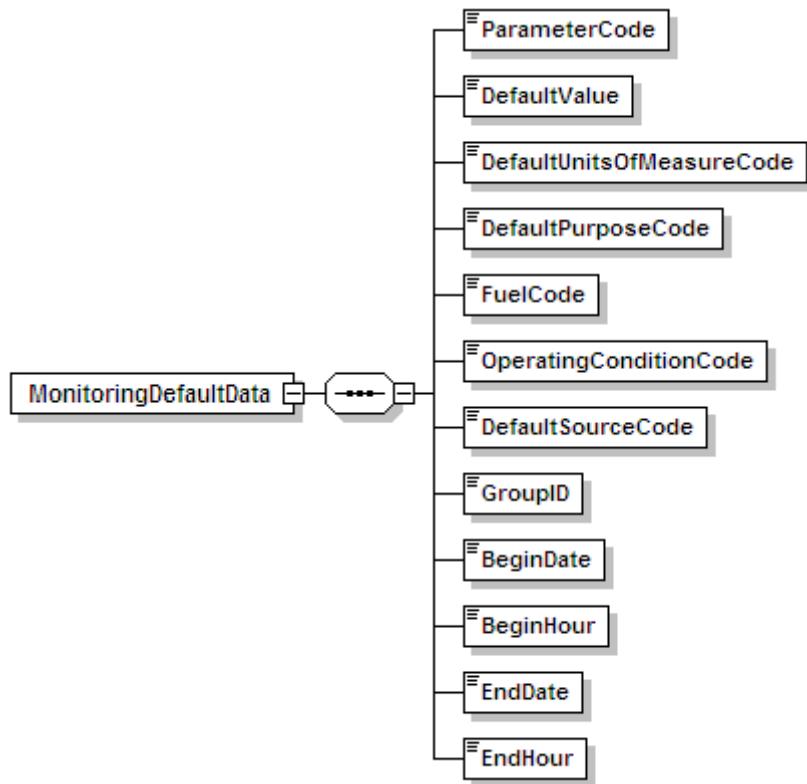

**Figure 6**  
**ComponentData**

**Figure 7**  
**ComponentData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
ComponentID	RequiredIdentifierType	The three digit code assigned by the source to identify the component.	510:10
ComponentTypeCode	ComponentTypeCode Type	Code used to identify the component type.	N/A
SampleAcquisition MethodCode	AcquisitionMethodCode Type	Code used to identify the sample acquisition method.	510:27
BasisCode	BasisCodeType	Code used to identify the moisture basis.	New
Manufacturer	ManufacturerType	Name of the manufacturer or developer of the component.	510:30
ModelVersion	ModelVersionType	The model of any hardware component or the version number of the software component.	510:55
SerialNumber	SerialNumberType	Serial number of the component.	510:70

**Figure 8**  
**MonitoringDefaultData**

**Figure 9**  
**MonitoringDefaultData XML Elements**

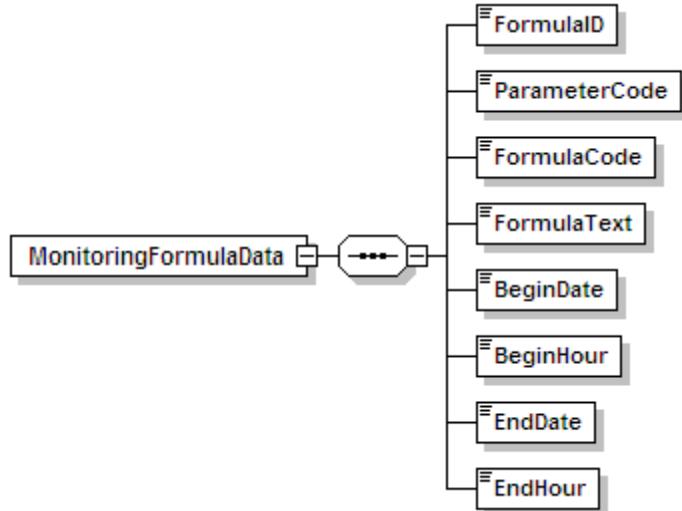

XML Tag	Type	Definition	EDR Reference (RT:Col)
ParameterCode	DefaultParameterCode Type	Code used to identify the parameter.	531:10
DefaultValue	DefaultValueType	Value of default, maximum, minimum, or constant.	531:14
DefaultUnitsOfMeasure Code	DefaultUnitsOfMeasure CodeType	Code used to identify the hourly parameter units of measure.	N/A
DefaultPurposeCode	DefaultPurposeCode Type	Code used to identify the purpose or intended use of defaults, maximums, and constants.	531:34
FuelCode	FuelCodeType	Code used to identify the type of fuel.	531:37
OperatingCondition Code	OperatingCondition CodeType	Code used to identify the operating condition.	531:40

(cont.)

**Figure 9**  
**MonitoringDefaultData XML Elements (cont.)**

XML Tag	Type	Definition	EDR Reference (RT:Col)
DefaultSourceCode	DefaultSourceCodeType	Code used to identify the source of the default value.	531:41
GroupID	GroupIDType	For a group of identical units using testing to determine default NO <sub>x</sub> rate, this ID identifies the group.	N/A
BeginDate	RequiredDateType	Date on which information became effective or activity started.	531:45
BeginHour	RequiredHourType	Hour in which information became effective.	531:53
EndDate	OptionalDateType	Last date in which information was effective. This date will be null for active records.	531:55
EndHour	OptionalHourType	Last hour in which information was effective. This value will be null for active records.	531:63

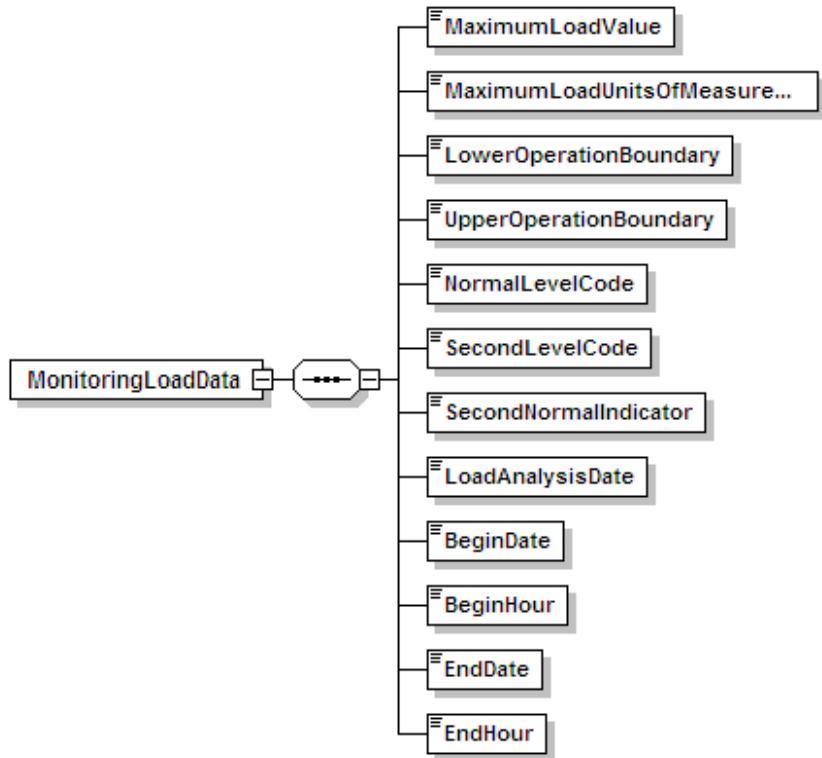

**Figure 10**  
**MonitoringFormulaData**

**Figure 11**  
**MonitoringFormulaData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
FormulaID	RequiredFormulaIdentifierType	The three character formula ID assigned by the source.	520:11
ParameterCode	FormulaParameterCodeType	Code used to identify the parameter.	520:14
FormulaCode	EquationCodeType	Code used to identify the equation as defined in Part 75.	520:18
FormulaText	FormulaTextType	The equation used to calculate the parameter.	520:23
BeginDate	OptionalDateType	Date on which information became effective or activity started.	New
BeginHour	OptionalHourType	Hour in which information became effective.	New
EndDate	OptionalDateType	Last date in which information was effective. This date will be null for active records.	New
EndHour	OptionalHourType	Last hour in which information was effective. This value will be null for active records.	New

**Figure 12**  
**MonitoringLoadData**

**Figure 13**  
**MonitoringLoadData XML Elements**

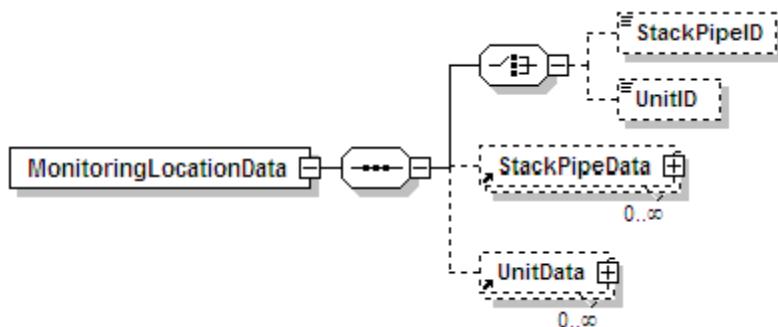

XML Tag	Type	Definition	EDR Reference (RT:Col)
MaximumLoadValue	MaximumLoadValueType	Maximum hourly gross load.	535:12
MaximumLoadUnitsOfMeasureCode	MaximumLoadUnitsOfMeasureCodeType	Code used to identify the units of measure for maximum load value.	535:10
LowerOperationBoundary	LowerOperationBoundaryType	Lower boundary of range of operation.	536:16
UpperOperationBoundary	UpperOperationBoundaryType	Upper boundary of range of operation.	536:10
NormalLevelCode	LevelCodeType	Code used to identify the normal load or operating level.	536:25

(cont.)

**Figure 13**  
**MonitoringLoadData XML Elements (cont.)**

XML Tag	Type	Definition	EDR Reference (RT:Col)
SecondLevelCode	LevelCodeType	Code used to identify the second most frequently used load or operating level.	536:22
SecondNormalIndicator	IndicatorType	Used to indicate the reporting of an additional normal load or a second operating level.	536:26
LoadAnalysisDate	OptionalDateType	The date in which load analysis was performed. This date only applies to CEM and Appendix D locations.	536:27
BeginDate	RequiredDateType	Date on which information became effective or activity started.	New
BeginHour	RequiredHourType	Hour in which information became effective.	New
EndDate	OptionalDateType	Last date in which information was effective. This date will be null for active records.	536:35
EndHour	OptionalHourType	Last hour in which information was effective. This value will be null for active records.	New

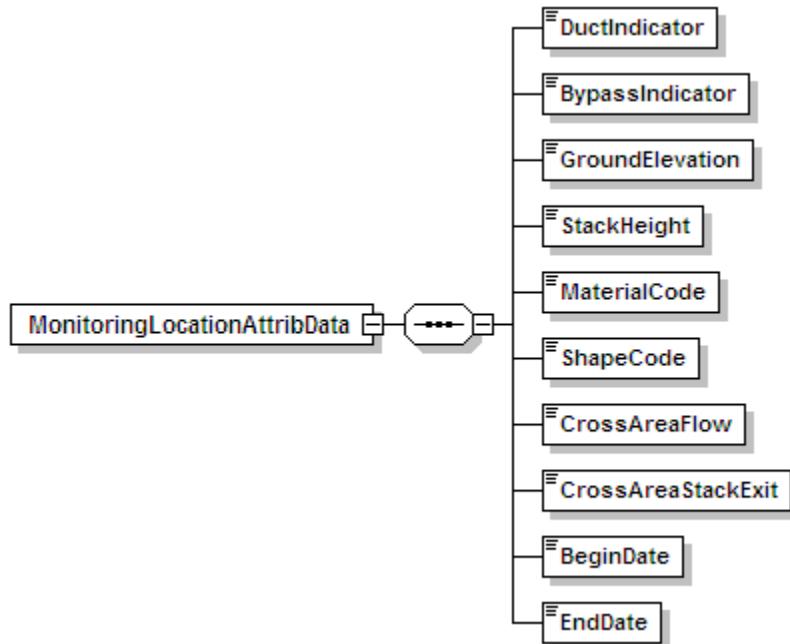

**Figure 14**  
**MonitoringLocationData**

**Figure 15**  
**MonitoringLocationData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
StackPipeID	RequiredStackPipeType	Three to six alphanumeric character code which is assigned by the source to identify a stack or pipe.	N/A
UnitID	RequiredUnitType	One to six alphanumeric character code assigned by the source to identify a unit.	N/A

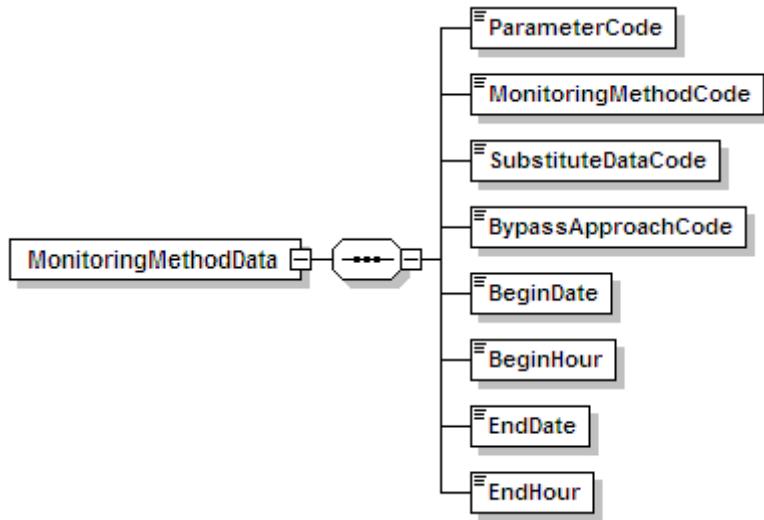

**Figure 16**  
**MonitoringLocationAttribData**

**Figure 17**  
**MonitoringLocationAttribData XML Elements**

<b>XML Tag</b>	<b>Type</b>	<b>Definition</b>	<b>EDR Reference (RT:Col)</b>
DuctIndicator	IndicatorType	Used to indicate that this location is a duct.	New
BypassIndicator	IndicatorType	Used to indicate that the stack is used for bypass.	503:61
GroundElevation	GroundElevationType	The number of feet above sea level at ground level of the stack or unit.	503:66
StackHeight	StackHeightType	The height in feet of a stack exit above ground level.	503:62
MaterialCode	MaterialCodeType	Code used to identify the material that is used in the monitoring location.	N/A
ShapeCode	ShapeCodeType	Code identifying the shape of a monitor location.	N/A
CrossAreaFlow	CrossAreaFlowType	The reported inside cross-sectional area in square feet of the stack or duct at the flow monitoring location.	503:75
CrossAreaStackExit	CrossAreaStackExit Type	The inside cross-sectional area in square feet of the stack at the exit.	503:71
BeginDate	RequiredDateType	Date on which information became effective or activity started.	New
EndDate	OptionalDateType	Last date in which information was effective. This date will be null for active records.	New

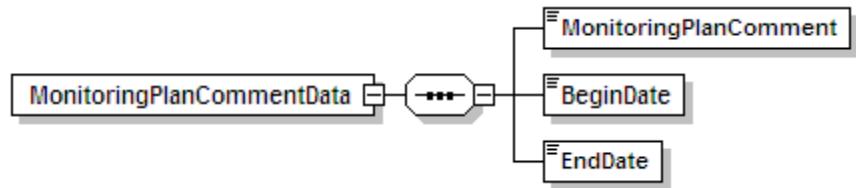

**Figure 18**  
**MonitoringMethodData**

**Figure 19**  
**MonitoringMethodData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
ParameterCode	MethodParameterCodeType	Code used to identify the parameter.	585:10
MonitoringMethodCode	MethodCodeType	Code used to identify the monitoring methodology.	585:10
SubstituteDataCode	SubstituteDataCodeType	Code used to identify the substitute data approach type.	585:28
BypassApproachCode	BypassApproachCodeType	Code used to identify the value to be used for an unmonitored bypass stack.	N/A
BeginDate	RequiredDateType	Date on which information became effective or activity started.	585:42
BeginHour	RequiredHourType	Hour in which information became effective.	New
EndDate	OptionalDateType	Last date in which information was effective. This date will be null for active records.	585:14
EndHour	OptionalHourType	Last hour in which information was effective. This value will be null for active records.	New

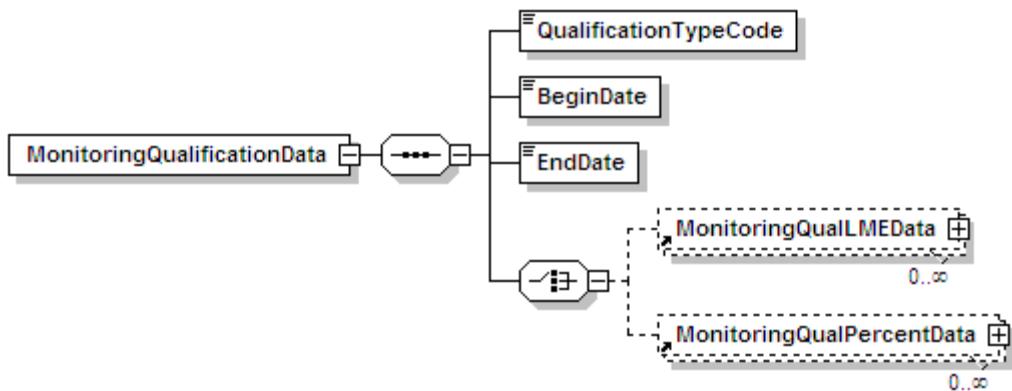

**Figure 20**  
**MonitoringPlanCommentData**

**Figure 21**  
**MonitoringPlanCommentData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
MonitoringPlanComment	MonitoringPlanCommentType	Comment on a monitoring plan.	910:4
BeginDate	RequiredDateType	Date on which information became effective or activity started.	New
EndDate	OptionalDateType	Last date in which information was effective. This date will be null for active records.	New

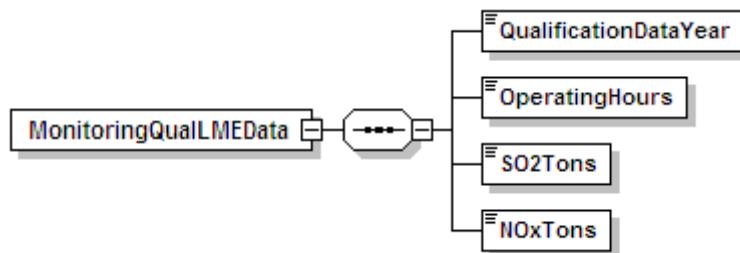

**Figure 22**  
**MonitoringQualificationData**

**Figure 23**

**Figure 36**  
**RectangularDuctWAFData**

**Figure 37**  
**RectangularDuctWAFData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
WAFDeterminationDate	OptionalDateType	The date the WAF applied was determined.	532:48
WAFBeginDate	RequiredDateType	The date on which the WAF was first applied to the flow rate data.	532:28
WAFBeginHour	RequiredHourType	The hour in which the WAF was first applied to the flow rate data.	532:36
WAFMethodCode	WAFMethodCodeType	Code used to identify the WAF determination method.	532:26
WAFValue	WAFValueType	The WAF applied to the flow rate data, to four decimal places.	532:20
NumberOfTestRuns	NumberOfTestRuns Type	The number of runs in the WAF test (must be one for default WAF and at least three for a measured WAF).	532:56
NumberOfTraverse PointsWAF	NumberOfTraverse PointsWAFType	The number of Method 1 traverse points in the WAF test runs.	532:58
NumberOfTestPorts	NumberOfTestPorts Type	The number of test ports at which measurements were made during the WAF test runs.	532:60
NumberOfTraverse PointsRef	NumberOfTraverse PointsRefType	The number of Method 1 traverse points in the "reference" flow RATA test runs.	532:62
DuctWidth	DuctWidthType	The width of the rectangular duct at the test location to the nearest 0.1 ft (i.e., dimension Lx in Figure 1 of CTM-041).	532:10
DuctDepth	DuctDepthType	The depth of the rectangular duct at the test location to the nearest 0.1 ft (i.e., dimension Ly in Figure 1 of CTM-041).	532:15
WAFEndDate	OptionalDateType	The date on which the WAF was last applied to the flow rate data.	532:38
WAFEndHour	OptionalHourType	The hour in which the WAF was last applied to the flow rate data.	532:46

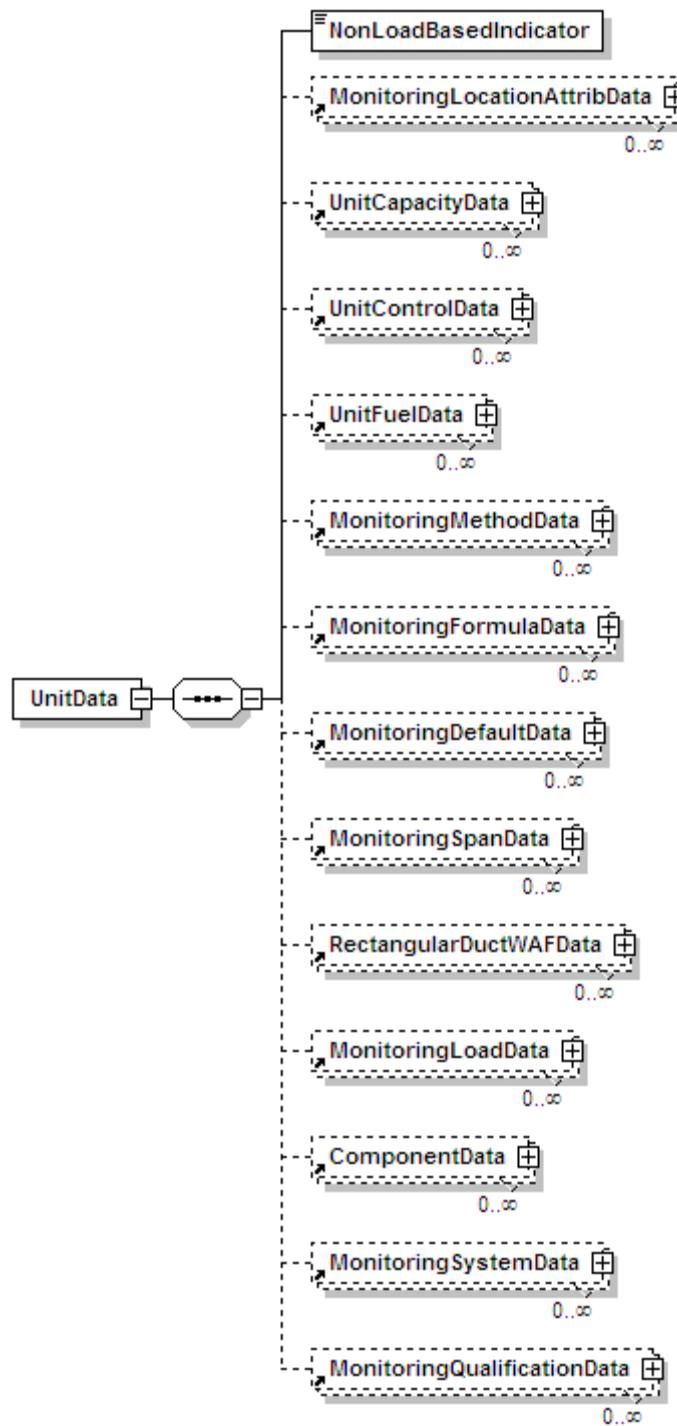

**Figure 38**  
**StackPipeData**

**Figure 39**  
**StackPipeData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
ActiveDate	RequiredDateType	The date that emissions first went through the stack or the effective date for data reporting.	503:49
RetireDate	OptionalDateType	The actual date that the stack or pipe was last used for emissions measurement or estimation purposes.	503:55

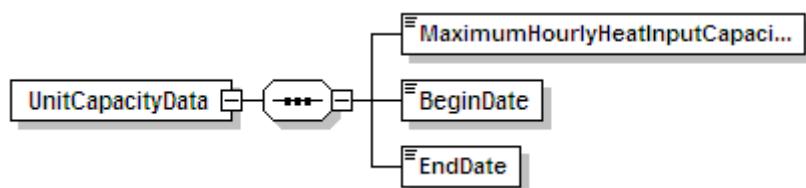

**Figure 40**  
**UnitData**

**Figure 41**  
**UnitData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)

**Figure 43**  
**UnitCapacityData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
MaximumHourlyHeatInputCapacity	MaximumHourlyHeatInputCapacityType	The maximum hourly heat input (mmBtu/hr) for the unit.	504:13
BeginDate	RequiredDateType	Date in which information became effective or activity started.	New
EndDate	OptionalDateType	Date on which a relationship or an activity ended.	New

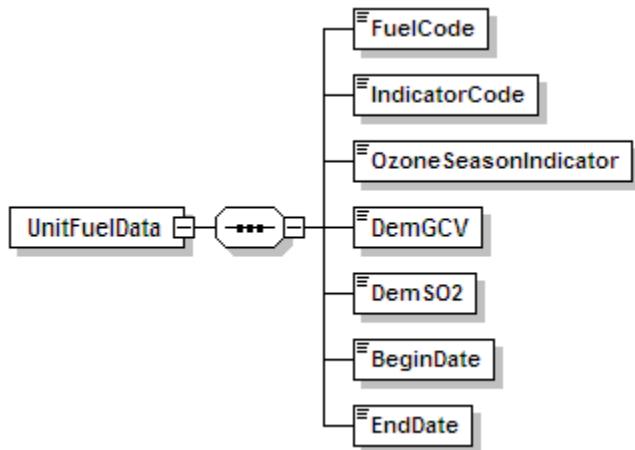

**Figure 44**  
**UnitControlData**

**Figure 45**  
**UnitControlData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
ParameterCode	UnitControlParameterCodeType	Code used to identify the continuous emissions parameter for the control.	586:10
ControlCode	ControlCodeType	Code used to identify the control type.	586:14
OriginalCode	IndicatorType	Used to indicate that the control equipment was installed and operated as part of the original unit design.	586:21
InstallDate	OptionalDateType	Date on which information became effective or activity started.	586:22
OptimizationDate	OptionalDateType	The approximate date on which optimization of control equipment was completed and the equipment made fully operational if the control equipment was not part of the original installation.	586:30
SeasonalControlsIndicator	IndicatorType	Used to indicate that the NO <sub>x</sub> control equipment is used during the ozone season.	586:46
RetireDate	OptionalDateType	Last date in which information was effective. This date will be null for active records.	586:38

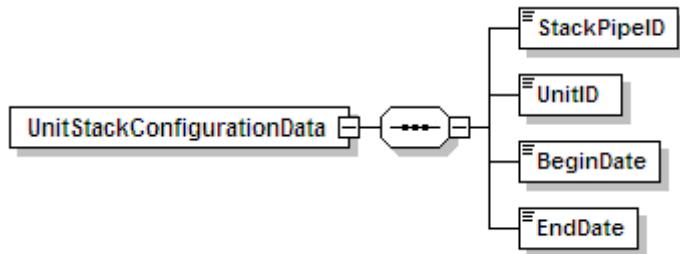

**Figure 46**  
**UnitFuelData**

**Figure 47**  
**UnitFuelData XML Elements**

XML Tag	Type	Definition	EDR Reference (RT:Col)
FuelCode	UnitFuelCodeType	Code used to identify the type of fuel which the unit is capable or will be capable of combusting.	587:10
IndicatorCode	IndicatorCodeType	Code used to identify the fuel usage (primary or secondary).	586:20
OzoneSeasonIndicator	IndicatorType	Used to indicate that the fuel is used during ozone season.	587:30
DemGCV	DemMethodCodeType	Demonstration method to qualify for monthly fuel sampling for GCV.	587:31
DemSO2	DemSO2Type	Demonstration method to qualify for daily fuel sampling for percent sulfur.	587:34
BeginDate	RequiredDateType	Date in which information became effective or activity started.	587:13
EndDate	OptionalDateType	Last date in which information was effective. This date will be null for active records.	587:21

**Figure 48**
