

Changes to Monitoring Plan XML Schema Version 1.1

The purpose of this document is to list the changes that have been made to the Monitoring Plan XML Schema Version 1.1. The document is organized in the following order:

- Changes to complex elements listed in alphabetic order.
- Changes to the validation types.

I. Complex Data Element

- Removed CalibrationStandardData. These data are now being provided through data elements in the Quality Assurance and Certification Test XML Schema.

II. Validation Types

- Removed CalibrationSourceCodeType because it is no longer used in the schema. Previously, it had been used to validate CalibrationSourceCode in the CalibrationStandardData Complex Data Element.
- Removed CalibrationStandardCodeType because it is no longer used in the schema. Previously, it had been used to validate CalibrationStandardCode in the CalibrationStandardData Complex Data Element.
